## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a target substance detection device having a periodic structure, an electromagnetic wave-projecting means, a detecting means, and temperature and polarization controlling means.

Group II, claim(s) 13-28, drawn to a target substance detection device having a flow path, periodic structure, an electromagnetic wave-projecting means, and a detecting means.

Group III, claim(s) 29-31, drawn to a target substance detection device having an optical fiber, an electromagnetic wave-projecting means, and a detecting means.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is a substance detection device having an

electromagnetic wave-projecting means and a detecting means. However, the special technical feature of claims 1-31 does not constitute as a special technical feature under PCT Rule 13.2 because the feature is recited in U.S. Patent 3,947,123 (CARLSON et al.). CARLSON et al. recites in claims 7-15, an apparatus for identifying specific particles contained in a sample using a beam of monochromatic electromagnetic wave energy and a detector.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made **with or without traverse**. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
